

**Master's of Science in Computer Science**  
**NON-THESIS**  
Revised July 3, 2023

## **Overview of Degree**

The Master's of Science degree in Computer Science (Non-Thesis Option) at The University of Georgia is a comprehensive program of study intended to give qualified and motivated students a thorough foundation in the theory, methodology, and techniques of Computer Science. Students who successfully complete this program of study will have a grasp of the principles and foundations of Computer Science. This degree program is designed for graduate students seeking careers in industry or government after graduation. The students will obtain skills and experience in up-to-date approaches to analysis, design, implementation, validation, and documentation of computer software and hardware. With these skills they will be well qualified for technical, professional, or managerial positions in government, business, industry, and education.

Prospective students are advised to consult The University of Georgia Graduate Bulletin for institutional information and requirements.

## **Admission Requirements**

In addition to the general University of Georgia policies set forth in the Graduate Bulletin, the following departmental policies apply to all applicants:

1. A Bachelor's Degree is required, preferably with a major in Computer Science or an allied discipline. Students with insufficient background in Computer Science must take undergraduate Computer Science courses to remedy any deficiencies (in addition to their graduate program). A sufficient background in Computer Science must include at least the following courses (or their equivalent):

MATH 2250	Calculus I (Differential Calculus)
MATH 2260	Calculus II (Integral Calculus)
CSCI 1301	Introduction to Computing and Programming
CSCI 1302	Software Development
CSCI 1730	Systems Programming
CSCI/MATH 2610	Discrete Mathematics for Computer Science
CSCI 2670	Introduction to Theory of Computing
CSCI 2720	Data Structures

2. Admission to this program is selective; students with a record of academic excellence have a better chance of acceptance. Students with exceptionally strong undergraduate records may apply for admission to the graduate program prior to fulfilling all of the above requirements.
3. Graduate Record Examination (GRE) official test scores are required for admission consideration. International applicants also need official TOEFL or official IELTS scores.
4. Three letters of recommendation are required, preferably written by university professors familiar with the student's academic work and potential. If the student has work experience, one letter may be from his/her supervisor. Letters should be sent directly from the letter writer.
5. A one or two-page personal statement outlining the student's background, achievements, and future goals is required.
6. A recent copy of applicant resume is required as part of the application packet.

### **Graduate School Requirements**

Additional requirements are specified by the Graduate School (application fee, general application forms, all transcripts, etc.). Please see the University of Georgia Bulletin for further information. Detailed admissions information may be found at Graduate School Admissions. Printed information may be obtained by contacting the

University of Georgia Graduate School  
310 Herty Drive, Brooks Hall, Athens, GA  
30602

phone: 706-542-1739  
e-mail: [gradadm@uga.edu](mailto:gradadm@uga.edu)

Applications are processed on a year-round basis. Students can be admitted for either semester (Fall or Spring). Please visit the Graduate School for application submission deadlines.

## Curriculum

The curriculum consists of at least **32 credit hours** of resident graduate coursework. This includes the following three items:

1. at least **12 credit hours** of Core CSCI graduate coursework at the 6000-level (see “Core Curriculum” below);
2. at least **16 credit hours** of Advanced CSCI graduate coursework at the 6000/8000-level (see “Advanced Coursework” below); this includes **at least 8 credit hours at the 8000 level**. The above (items 1 & 2) must include 12 credit hours of coursework open only to graduate students, exclusive of 6950 and 8990, as per Graduate School policy.
3. at least **4 credit hours** of MS CSCI NT Project coursework (CSCI 7200).

Typically, full-time students will take 9 to 15 credit hours per semester. See the CSCI section of the University of Georgia Bulletin for course descriptions. A program of study should be a coherent and logical whole; it requires the approval of the student’s Major Professor/Project Advisor (see below) and the departmental Graduate Coordinator.

Note: **No CSCI course with a grade of C+ or lower may be included on the student’s Program of Study** (see the Graduate Bulletin for other GPA constraints).

### Core Curriculum (Item #1)

At least one course from each of the following three groups must be taken:

#### Group 1: Theory

CSCI 6470 Algorithms  
CSCI 6480 Approximation Algorithms  
CSCI 6610 Automata and Formal Languages

#### Group 2: Software Design

CSCI 6050 Software Engineering  
CSCI 6370 Database Management  
CSCI 6570 Compilers

#### Group 3: System Design

CSCI 6720 Computer Architecture and Organization  
CSCI 6730 Operating Systems  
CSCI 6760 Computer Networks: Technology and Application  
CSCI 6780 Distributed Computing System

The core curriculum consists of a total of **12 credit hours**.

### **Core Competency**

Foundational computer science knowledge (core competency) in the core areas (Groups 1, 2, and 3, above) must be exhibited by each student and certified by the department. This takes the form of achievement in core curriculum. A grade average of at least 3.30 (e.g., B+, B+, B+) must be achieved for the three core courses. Students below this average may take an additional core course and achieve a grade average of at least 3.15 (e.g., B+, B+, B, B).

Core competency is certified by the student's Major Professor/Project Advisor (see below) with the approval of the Graduate Coordinator. The student's Major Professor/Project Advisor manages the core competency in cooperation with the student. Students are expected to meet the core competency requirement within their first two enrolled academic semesters (excluding summer semester). **Core Competency Certification must be completed before approval of the Program of Study.**

Note: a course used to fulfill part of the core requirement (Item #1) may not be used to also fulfill part of the advanced coursework requirement (Item #2). A student may fulfill their core requirement (12 core hours) and then take another (different) graduate student only course from the core list to count toward their advanced coursework requirement. In no case shall a course used to fulfill part of the core course requirement count toward the core requirement AND the advanced coursework requirement.

### **Advanced Coursework (Item #2)**

Students must take at least **16 credit hours** of advanced CSCI graduate-level coursework. This includes at least 8 credit hours at the 8000-level (must also fulfill the Graduate School requirement of at least 12 credit hours of graduate only coursework).

In no case shall a 6000-level course used to fulfill part of the advanced coursework requirement count toward the advanced coursework requirement AND the core curriculum requirement.

### **Master's Project and Report (Item #3)**

To satisfy this requirement, **4 credit hours** of CSCI 7200 Master's Project must be taken, spread over the student's final two semesters. The CSCI 7200 course involves an applied research project under the direction of the student's Major Professor/Project Advisor and a second School of Computing Professor (see below). As part of the requirements, a **comprehensive report** must be prepared detailing the student's procedures and findings regarding the completed project work.

### **Non-Departmental Requirements**

GRSC 7001 GradFIRST Seminar is required for all graduate students at University of Georgia. This course must be taken in semester 1 or semester 2. The course is not repeatable.

Non-departmental requirements are set forth by the Graduate School (see the Graduate Bulletin). They concern residence, time limits, programs of study, acceptance of transfer credits, minimum GPAs, thesis, and final examination.

### **Graduation Requirements**

Before the end of the second semester in residence, a student must begin submitting forms to the Graduate School, through the Graduate Coordinator, including a Program of Study Form. The Major Professor/Project Advisor and a second professor, must come from the School of Computing Faculty (Professors/Lecturers). The MS CSCI NT Project Form is due by Reading Day in final semester. The Program of Study Form indicates how and when degree requirements will be met and must be formulated in consultation with the student's Major Professor/Project Advisor. An Application for Graduation Form must also be submitted through Athena portal.

Forms and Timing must be submitted as follows:

1. Core Competency Form (departmental) - beginning of third semester
2. Program of Study Form (G138) - semester before the student's last semester
3. Application for Graduation Form (Athena) - beginning of last semester
4. MS CSCI NT Project Form- (departmental)-by Reading Day in final semester.

See "Important Dates and Deadlines" on the Graduate School's website.
